2011 Winter Heating Collection

Winter's
looking
good

www.omegaltise.com.au

For comfortable living

There's nothing better than the feeling of coming in from the cold to a warm and inviting home.

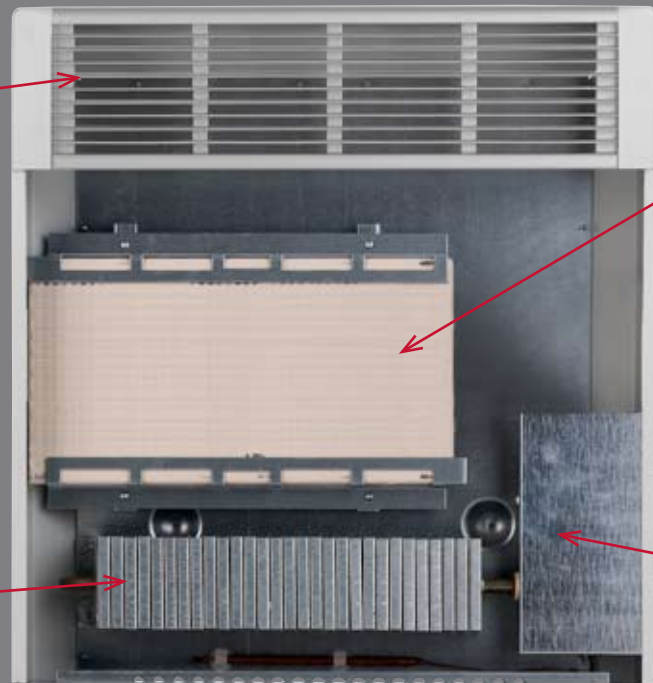

The Omega Altise range of heating products provides a heating solution whatever the size of your living environment. From the smallest apartment to the largest home, Omega Altise offers heaters with designer styling to blend with any décor and the latest innovations to enhance heating effectiveness and lower energy usage.

From our unique new panel heaters with patented heat retention tablets to micathermic heaters, to reverse cycle air conditioners, air purifiers and dehumidifiers, the Omega Altise range offers comfortable living all through the winter season.

Introducing new German technology to heat your home with even more efficiency.

Easy to clean, high quality aluminium grille

Up to 2.4kW high quality stainless steel element prevents rusting

Patented magmatic heat retention tablet made from 100% bio-degradable ceramic material that can potentially reduce electricity use by up to 10% less than traditional convection heaters.

IP24-splash resistant control panel for wet area use

With the magmatic heat retention tablet at the centre of the heater, there is a more even distribution of heat, radiating from the middle and also the top of the heater.

When the room has reached the required temperature the

built-in thermostat automatically cuts off power to the unit. The Magmatic heat retention tablet then continues to provide additional continuous heat to the room for up to 30 minutes without any further use of electricity.

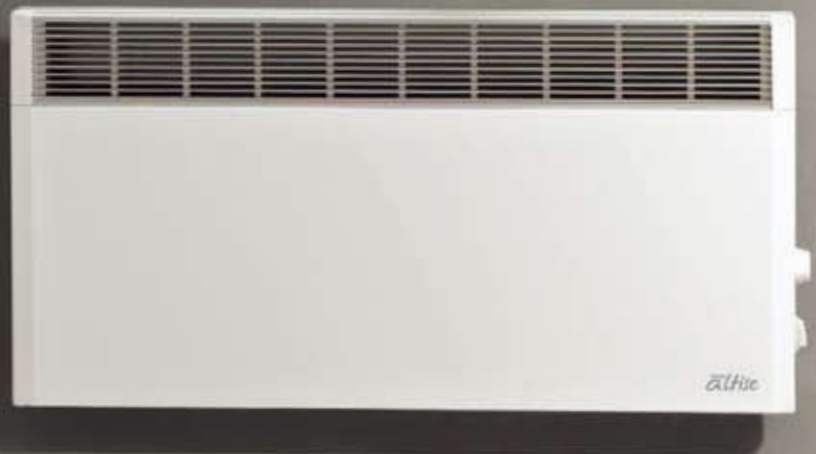

Altise Elite Panel Heaters

A super efficient, German quality heater with the unique power saving benefit of a patented heat retention tablet inside.

OAE24ET

ALTISE ELITE PANEL HEATER

- 2400W convection panel heater
- Patented Magmatic heat retention tablet delivers greater energy efficiency than a traditional convector heater
- Choose from 10 temperature levels between 4° & 40°
- Anti-freeze protection - thermostat can cut in if ambient temperature drops below 4°
- Highly consistent thermostat provides constant temperature and optimum energy consumption
- 2.4kW high quality stainless steel element prevents rusting
- Digital display with 24 hour, 7 day programmable timer & temperature display
- Free-standing feet and wall mountable kit included
- IP24 splash resistant control panel for wet area use
- Aluminium grille for easy cleaning
- Precision, German quality engineering and manufacturing
- 5 year warranty
- 915 x 445 x 85 (w/h/d mm)

Panel Heaters

Precision German Engineering

The clean, unobtrusive styling of these heaters allows them to fit seamlessly into any room in your home. Perfect for where space is at a premium, these slimline panel heaters can be wall mounted as the heat emits from one side or used free standing on feet for greater portability around the home.

Efficient and economical, both the Altise Elite and the OAP24MT models feature auto safety cut-out, are completely silent and emit clean, healthy heat.

Altise Panel Heater

Unique and slimline, German made versatile heater.

OAE15ET* **ALTISE ELITE PANEL HEATER**

- 1500W convection panel heater
- Patented Magmatic heat retention tablet delivers greater energy efficiency than a traditional convector heater
- Choose from 10 temperature levels between 4° & 40°
- Anti-freeze protection - thermostat can cut in if ambient temperature drops below 4°
- Highly consistent thermostat provides constant temperature and optimum energy consumption
- 1.5kW high quality stainless steel element prevents rusting
- Digital display with 24 hour, 7 day programmable timer & temperature display
- Free-standing feet and wall mountable kit included
- IP24 splash resistant control panel for wet area use
- Aluminium grille for easy cleaning
- Precision, German quality engineering and manufacturing
- 565 x 445 x 85 (w/h/d mm)

OAP24MT **ALTISE PANEL HEATER**

- 2400W convection panel heater
- Choose from 5 temperature levels between 4° & 40°
- Anti-freeze protection - thermostat can cut in if ambient temperature drops below 4°
- Highly consistent thermostat provides constant temperature and optimum energy consumption
- 24 hour manual timer - Pre-set the 'turn on' or 'turn off' time. Set and forget
- 2.4kW high quality stainless steel element prevents rusting
- Free-standing feet and wall mountable kit included
- IP21 splash resistant control panel for wet area use
- Aluminium grille for easy cleaning
- Precision, German quality engineering and manufacturing
- 915 x 445 x 85 (w/h/d mm)

Micathermic

Innovative Heating Technology

Micathermic heaters in both panel and column styles, use innovative Mica heating elements formed in a unique V-shape for enhanced efficiency.

The micathermic elements are ultra fast, silent and reach maximum heat in just 60 seconds. The non-oil element makes these high performance heaters lightweight, easy to move and with a combination of both convection and radiant heat you enjoy fast and efficient heat distribution.

All micathermic heaters have adjustable thermostats, safety tilt switches and thermal cut off ensuring your comfort and safety.

Micathermic Column Heaters

Lightweight and easily stored, these column heaters are attractive and practical heating units that can be moved from room to room.

OMC24E1 MICATHERMIC COLUMN HEATER

- 2400W column heater
- Fast heat up – reaches maximum heat output in 60 sec
- 3 heat settings – 900/1500/2400W
- Unique v-shaped element for enhanced efficiency
- Programmable electronic timer
- Adjustable thermostat
- Silent operation
- Cord storage
- Anti-frost protection
- Safety off and thermal cut-out
- 590 x 650 x 250 (w/h/d mm)

OMC15E1 MICATHERMIC COLUMN HEATER

- 1500W column heater
- Fast heat up – reaches maximum heat output in 60 sec
- 3 heat settings – 600/900/1500W
- Unique v-shaped element for enhanced efficiency
- Programmable electronic timer
- Adjustable thermostat
- Silent operation
- Cord storage
- Anti-frost protection
- Safety off and thermal cut-out
- 440 x 650 x 250 (w/h/d mm)

Micathermic Panel Heaters

Slim, stylish and unobtrusive, these panel heaters come complete with castors or can be wall mounted for even more convenience.

OMP24E MICATHERMIC PANEL HEATER

- 2400W
- 2 heat settings 1200/2400W and auto option
- 24 hour electronic timer
- LCD display with remote control
- IP24 splash resistant for wet area use
- 950 x 570 x 230 (w/h/d mm - with wheels)
- 950 x 500 x 60 (w/h/d mm - wall mounted)

OMP24E

OMP15E MICATHERMIC PANEL HEATER

- 1500W
- 2 heat settings 750/1500W and auto option
- 24 hour electronic timer
- LCD display with remote control
- IP24 splash resistant for wet area use
- 800 x 570 x 230 (w/h/d mm - with wheels)
- 800 x 500 x 60 (w/h/d mm - wall mounted)

Convector Heaters

Designed for convenience

Convection heating takes the chill out of the air as it passes over the concealed heating element and silently the warmed air rises to flow around the room giving you a perfect level of comfort.

Omega Altise convectors feature thermostat controls with variable settings and safety overheating protection. For faster warming turbo fans are featured on model OCON20F.

Convactor Heaters

Lightweight, portable, contemporary styled heaters ideal for silently warming the room you're in.

OCON20 CONVECTOR HEATER

- 3 heat settings - 800/1200/2000W
- Overheat safety cut out
- 685 x 180 x 430 (w/h/d mm)

OCON20F CONVECTOR HEATER WITH FAN

- 2 heat settings - 800/2000W
- Turbo fan for instant heat boost
- Overheat safety cut out
- 685 x 180 x 430 (w/h/d mm)

For comfortable living 7

Oil Column Heaters

Total heat control
- proven performance

The silent, safe and effective method of heating oil-filled columns to radiate warmth is a great option for portable room to room heating. With a range of sizes from 5 to 11 fin this style of heating will warm your room, from small to large rooms of up to 24m².

Omega Altise column heaters all feature adjustable thermostats, 24 hour timers, 400W turbo boost fans, humidifier cups to keep air from drying out and handy cord storage.

Oil-Filled Column Heaters

It's difficult to go past these reliable, easy to operate and safe heaters. The ideal way to warm your winter.

OC1005 5 FIN OIL-FILLED COLUMN HEATER

- 1000W oil-filled column heater
- 5 fins
- 3 heat settings – 500/900/1000W
- Adjustable thermostat
- Turbo boost fan (400W)
- 24 hour timer
- Removable humidifier cup to keep the air from drying out
- Thermal cut off sensors
- Cord storage
- 290 x 645 x 160 (w/h/d mm)

OC1507 7 FIN OIL-FILLED COLUMN HEATER

- 1500W oil-filled column heater
- 7 fins
- 3 heat settings – 600/1300/1500W
- Adjustable thermostat
- Turbo boost fan (400W)
- 24 hour timer
- Removable humidifier cup to keep the air from drying out
- Thermal cut off sensors
- Cord storage
- 370 x 645 x 160 (w/h/d mm)

OC2411TF 11 FIN OIL-FILLED COLUMN HEATER

- 2400W oil-filled column heater
- 11 fins
- 3 heat settings – 1000/1800/2400W
- Adjustable thermostat
- Turbo boost fan (400W)
- 24 hour timer
- Removable humidifier cup to keep the air from drying out
- Thermal cut off sensors
- Cord storage
- 530 x 645 x 160 (w/h/d mm)

Radiant Heaters

Fast heating quartz elements

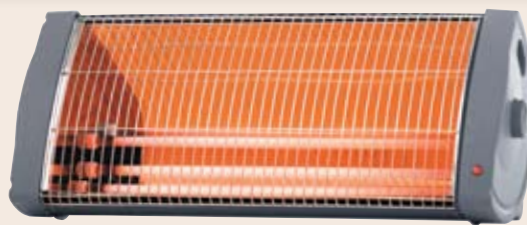

The ever popular radiant heater gives you instant warming and the visible red glow of the heating element is visually satisfying and welcoming.

Omega Altise radiant heaters all feature power light indicators, a choice of heat settings and safety off switches.

Radiant Heaters

The range of Omega Altise radiant heaters are convenient, lightweight and easily moved to wherever you want.

OR241 QUARTZ ELEMENT HEATER

- 2400W three-bar quartz element heater • 3 heat settings – 800/1600/2400W • Rear reflector for quick heating and maximum radiant warmth • Light weight construction with side handles • Power on/off indicator light • Thermal cut out sensors for greater protection
- No assembly required • 584 x 238 x 195 (w/h/d mm)

OR24FG INFRA-RED QUARTZ RADIANT HEATER

- 2400W three-bar infra-red quartz radiant heater • 3 heat settings – 800/1600/2400W
- Adjustable thermostat • Large stainless steel reflector for maximum output • Fan assisted for more effective circulation of heat • Power on/off indicator light • Light weight construction with side handles • Safety tilt switch • Cord storage • 670 x 550 x 265 (w/h/d mm)

OR24C FAN FORCED RADIANT & CERAMIC HEATER

- 2400W ceramic radiant heater • 3 heat settings - 900 (PTC & fan)/1500 (2 x 750 quartz elements)/2400W (All elements working) • PTC 900W ceramic heating element combined with two 750W quartz radiant bars each side which are thermostatically controlled • Adjustable thermostat - Greater control over the level of comfort and energy consumption • Manual controls for simple, easy to use operation • Fan assisted for more effective circulation of heat • Modern styling with ceramic technology • 590 x 310 x 237 (w/h/d mm)

True Reverse Cycle Air Conditioners

Portable comfort
- winter and summer
- save on heating costs

These stylish Omega Altise air conditioners are all true reverse cycle for year round comfort. They feature the latest technology and controls that make them convenient and easy to use.

On the cooling setting all units have aqua chill technology that recycles condensed humidity for improved efficiency, remote and electronic controls, variable thermostats, pre-set timer function, active carbon filters, directional louvres and window installation kits to fit most standard windows.

True Reverse Cycle Air Conditioners

Portable and efficient air conditioners to keep you comfortable in winter and summer, with low running costs.

OAPC15RC 15,000BTU PORTABLE AIR CONDITIONER

- 2 speed settings
- Output 15,000BTU (4.4kW) cooling capacity, input 1.5kW
- Output 15,000BTU (4.4kW) heating capacity, input 1.5kW
- Maximum air movement of 550m³/hr
- Humidity removal of up to 1.6 litres per hour
- Internal water tank capacity 1.8 litres
- Nett weight 33kg
- 422 x 825 x 443 (w/h/d mm)

APC12RC 12,000BTU PORTABLE AIR CONDITIONER

- 2 speed settings
- Output 12,000BTU (3.5kW) cooling capacity, input 1.230W
- Output 12,000BTU (3.5kW) heating capacity, input only 1.056kW
- Maximum air movement of 440m³/hr
- Humidity removal of up to 1.3 litres per hour
- Nett weight 29kg
- 365 x 745 x 395 (w/h/d mm)

OAPC14RC 14,000BTU PORTABLE AIR CONDITIONER

- 2 speed settings
- Output 14,000BTU (4.1kW) cooling capacity, input 1.350kW
- Output 14,000BTU (4.1kW) heating capacity, input 1.350kW
- Maximum air movement of 410m³/hr
- Humidity removal of up to 1.37 litres per hour
- Internal water tank capacity 1.4 litres
- Nett weight 30kg
- 365 x 745 x 395 (w/h/d mm)

APC12RC, OAPC14RC

Dehumidifiers and Air Purifiers

Clean air comfort

The quality of the air we breathe is vital to our wellbeing. Omega Altise air purifiers clean the air of many harmful pollutants and bacteria so you and your family can breathe easy.

Omega Altise air purifiers have triple action purification. 3M high airflow filter (HAF) or HEPA filter which removes most airborne particles and allergens. An active carbon filter removes odours, VOC's and larger dust particles. An ionizer inside for fresher, cleaner air.

Our Australian climate can be extreme from chilling cold to steamy, humid and hot. The Omega Altise dehumidifier increases your comfort by removing moisture from the air inside your home, making it easier to breathe and reducing the possibility of mould or mildew forming.

Dehumidifiers and Air Purifiers

Portable and unobtrusive, Omega Altise dehumidifiers and air purifiers quietly improve air quality.

OPAL MINI

- 1 touch control
- Tumbler design for safety
- Blue LED power light – acts as a night light
- HAF with carbon filter removes most airborne particles (down to 0.1 micron)
- Anti-microbial agents inhibit growth of mildew on the filter
- Ionizer inside – for fresher, cleaner air
- Fragrance rack
- Low energy consumption (17W)
- 155 x 213 x 166 (w/h/d mm)

ODE10 10L DEHUMIDIFIER

- 10L dehumidifier
- Humidistat manual control on/off switch
- Removable washable filter
- 10L per day moisture removal
- 3.6L water tank
- Water full indicator light
- Power input 260W
- 342 x 492 x 245 (w/h/d mm)

ODE20 20L DEHUMIDIFIER

- 20L dehumidifier
- UV light purification system which helps kill off the bacteria in the air as it passes through the unit
- 2 speed settings
- Electronic control and LCD display
- 24 hour timer
- 20L per day moisture removal
- 5.5L water tank
- Tank full auto off and indicator light
- Power input 370W
- 410 x 545 x 210 (w/h/d mm)
